

Access Control

Access Etc supply and install access management control systems for many types of commercial and industrial buildings as well as controlled access entry systems for residential and communal environments.

Access Control – entry systems

Security solutions across multiple sites and hundreds of door entry points.

The systems we install are designed to keep buildings, staff and assets secure.

Entry system control provides security by giving flexible control over who is allowed to enter the building and when.

Access systems

Multiple Access options - PROXIMITY - CARD ENTRY - KEYPAD - BIOSCRIPT

Suitable for many types of access control including business premises, schools, leisure facilities storage and apartment complexes. Up to 10,000 users for proximity and card systems with up to 50 possible codes for keypads. Systems are scalable with readers and hardware compatible between systems.
