For advise on Platform Lifts or to arrange a site consultation contact Access Etc offices on 0844 879 4312 or email: enquiry@etc-access.com

Access Etc. designs for a better environment.

A-V4

Straight track

Improving access by removing barriers often encountered within older buildings can

present a number of technical challenges. The existing structural limitations often require extensive construction works to accommodate use of traditional elevators.

Taking reasonable consideration of the buildings use, plus any budget constraints can prevent passenger lifts and vertical platforms from being a practical option.

Incline platform lifts achieve access for wheelchair users via an existing staircase. Minimum preparation and installation time

A-V5

Curved track

provides building owners & property management with an achievable access solution

Define - Design – Deliver

Incline platform lifts from Access Etc are suitable for both straight & curved stairs. The versatile track mounting system allows stanchion posts, wall mounting or modular framework designs suited to most staircases

Incorporated over-speed safety governor and fully compliant with European Directives 73/23 Low Voltage- 89/336 Electromagnetic and 98/37EC Machinery Directive & CE mark

Technical Specification

Location	Indoor or Outdoor
Capacity	230kg -Up to 45°
Speed	5 to 8 m/min.
Power supply	230V fused spur. 24V DC sub circuit
Platform sizes	1250 x 800 mm 1050 x 770 mm 830 x 700 mm
Safety	Over-speed device Safety edges
Controls	Keyed operation Constant pressure Emergency stop
Colours	Unit -White RAL9018 Rail - Black finish

Optional features

- Audible alarm
- Radio control
- Platform sizes
- Flashing light
- Auto folding
- Folding seat
