A-rise

Designing vertical circulation of multi-storey building requires careful consideration.

Vertical platform lifts are one solution in helping to provide independent access.

Procurement considerations include compliance with industry standards legislation guidelines and product suitability for the user and environment.

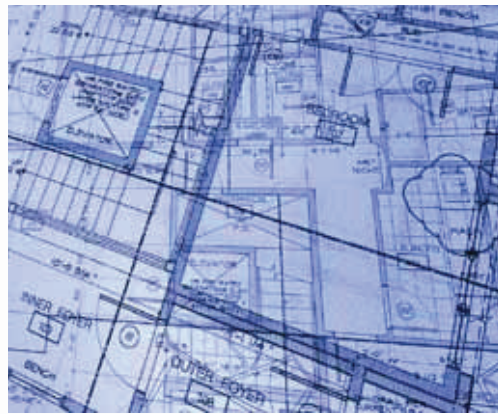

A-line

Access Etc. provide informed support throughout the process. We focus on quality workmanship and effective project management. Our technical guidance of building works and site communication ensures a smooth and accurate installation

A-cab

Inception to handover & aftercare - we aim to exceed service expectations.

Define - Design – Deliver

Our platform lifts are designed for both inside and outdoor conditions. With installation into masonry built shafts or standalone positions

Doors and walls can be fully or part glazed with fire rated doors incorporated for 1 hour protection between landing levels.

Fully compliant with safety codes of practice European Directives for machinery 98/37/EC amended 2006/42/EC. Notified & CE marked
